

Net Zero Greenhouse Gas Emissions Consultation

Online Drop in Session

The Synod Climate Action Taskforce and JIM Cluster would like to hear the views of Uniting Church members on what the Synod position should be in reaching a target of net zero carbon emissions. This synod wide online drop in session will be the final opportunity have your say before consultations close at the end of May. Drop in to share your thoughts, listen and participate in discussion. This will be a semi-structured online session with an emphasis on talking rather than delivering content.
